

Permanent Representation of the Czech Republic to the European Union

Czech EU Presidency 2009

Czech Presidency as a series of results

The Czech EU Presidency took place under difficult conditions, due to the economic crisis, an unstable international situation and the end of the term of office of the European Parliament and the European Commission. Despite these challenges, during the six months of its Presidency, Czechia scored a number of tangible results and outstanding achievements. Czechia also brokered more than 80 concrete measures in the European Parliament; proved itself to be a good crisis manager; resolutely rejected protectionist tendencies and put through measures to boost European economy. Under the Czech leadership the European Union took important steps towards diversification of energy supply and towards climate protection.
